smart battery charger

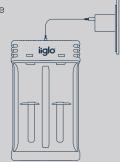

Description of the device

- 1-LED indicator
- 2-Cooling grid
- 3-Battery slot 1
- 4-Battery slot 2
- 5-Micro USB input port
- 6-USB-A connector
- 7-Micro USB connector

Using the device

- 1. Connect the Micro USB connector (see Fig. 7) of the included cable to the Micro USB socket in the charger (see Fig. 5.)
- Connect the USB-A connector (see Fig.6) of the included cable to the adapter or other device from which you wish to power the charger.
- 3. Ensure that the power adapter is getting sufficient power to the charger.
- 4. The LED indicator (Fig.1) will shine red at first, turn green, and quickly turn off. The device is now ready for charging.

Charging process

- 1. Insert the rechargeable batteries according to the orientation indicated by positive "+" and negative "-" signs.
- 2. The LED indicator will turn red while charging.
- 3. When the batteries are fully charged, the LED indicator turns green.

Note: the LED indicator will quickly flash red if the batteries are bad or incorrectly inserted.

Specification

| 0 | Input | DC 5V/2A |
|------------------|-----------------|--------------------|
| | Battery Types | Li-ion, Ni-MH/Cd |
| (P) | Max Wattage | 10W |
| ~\\\-\-\. | Current | 0.5A/1.0A*2 |
| [ndminininimini] | Size(L*W*H) | 100 * 60 * 28.5 MM |
| KG | Weight | 60.2g±5g |
| V | Certificated by | CE, ROHS, FCC |

Attention

Use sufficient power supply

Don't disassemble

Used for 3.7V Li-ion and 1.2V Ni-MH/Cd batteries

Avoid dropping

Don't expose to liquids

Avoid extreme temperature

Model no: IICHARGEUSBU3PRO02
